- Delhi Youth Build ₹ 1500 Air Purifier
- India's Fight Against Air Pollution: Why Citizen Science Matters
- Why Defeating Dumpsite Methane Needs Entrepreneurs and Government Working Together
- International Climate Olympiad 2026
- NewBook Releases

India needs Better Infrastructure for Green Manufacturing - CII

A recent CII summit with the theme 'Building Climate Resilient and Competitive Businesses' emphasised on enhancing the ESG capacity of the entire value chain, not just of large companies, if India's green transition is to start showing results.

Essensai067 - From an Old Textile Mill to a Sustainable Space

Instead of demolishing an old mill to build a new space, Essensai067 has retained Sai Lakshmi Mill's elements of its original structure and textures and integrated it into the new destination with essential sustainability features.

Delhi Youth Build ₹ 1500 Air Purifier

A team of young leaders from the New Delhi Hub of the Global Shapers Community has developed a low-cost air purifier that costs nearly 90% less than commercial alternatives, earning international recognition at the World Economic Forum's Global Shapers Annual Summit in Geneva recently. Project lead, Aditi Agarwal, received the Innovation Prize Award.

India's Fight Against Air Pollution: Why Citizen Science Matters

India's fight against air pollution has not made much headway.. The only way to force faster change is when citizens learn and understand the ill effects of pollution on their health. Well-informed citizens should form communities to force change. There have been pockets of success, but to make this into a national movement, citizens should take the lead.

International Climate Olympiad 2026

We all know that climate change will significantly change our future; extreme temperatures, flooding, and infrastructure collapse are all inevitable results of this. It is essential that our children not only understand this issue but also develop the ability to address it.
